SESI 01 PRAKTIKUM PEMROGAMAN FRAMEWORK

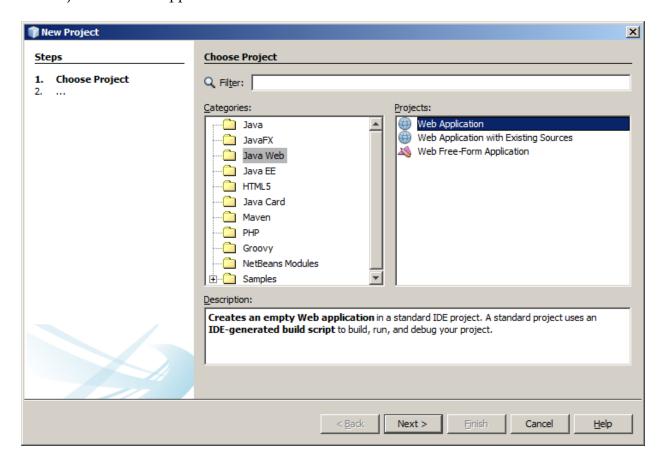

1. Buat folder di drive Z:

FWK-SESI1-KELAS-NAMA (FWK-SESI1-2IF1-GUNAWAN)

2. Jalankan NetBeans IDE 8.0.2

3. Buat Project Baru Categories : Java Web

Projects : Web Application

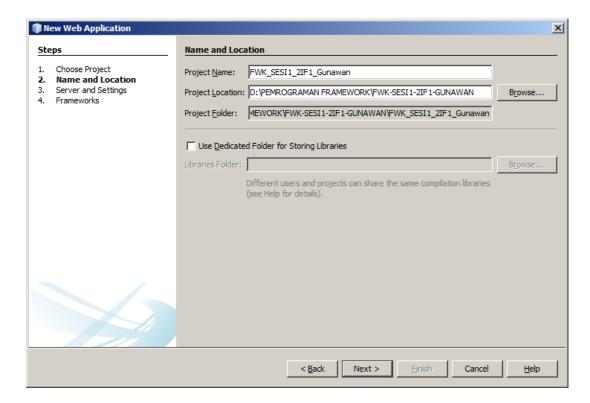

4. Klik Next

5. Isikan

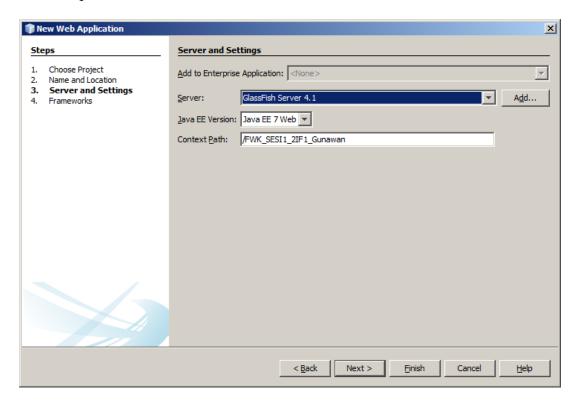

Project Nama : FWK_SESI1_2IF1_GUNAWAN (Sesuiakan kelas dan nama anda)

Location : folder and a yang ada di drive Z (klik Browse)

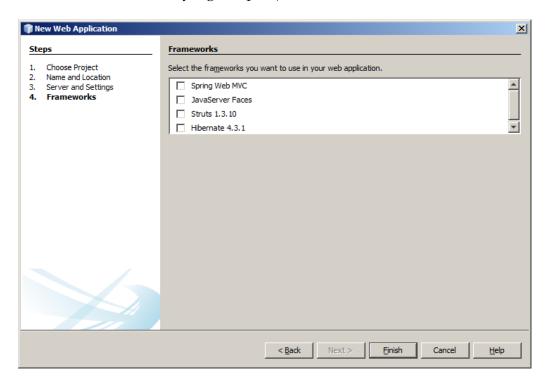

6. Klik Next

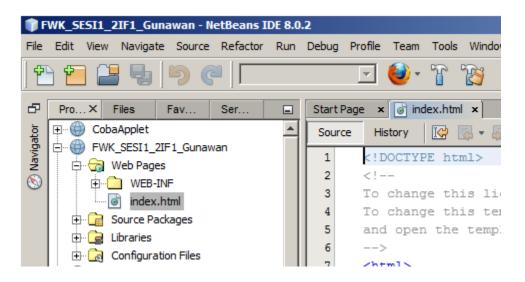

7. Pada pilihan Server, klik GlassFish Server lalu klik Next

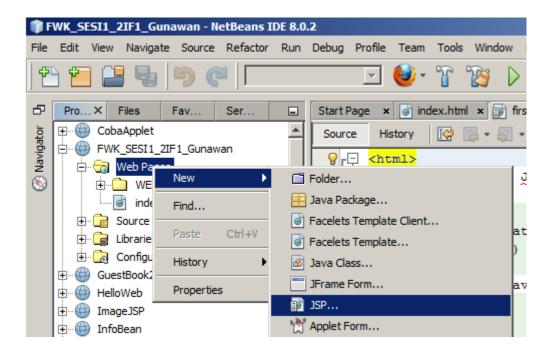

8. Pada bagian Frameworks (pada contoh kali ini tidak menggunakan framework, sehingga tidak ada framework yang kita pilih), klik Finish.

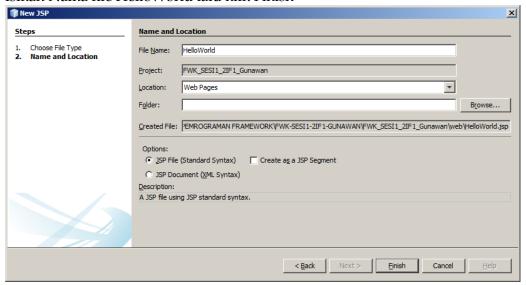

9. Struktur project Anda menjadi seperti di bawah ini:

10. Buat file JSP, klik kanan pada bagian Web Pages di project Anda, pilih New lalu klik JSP

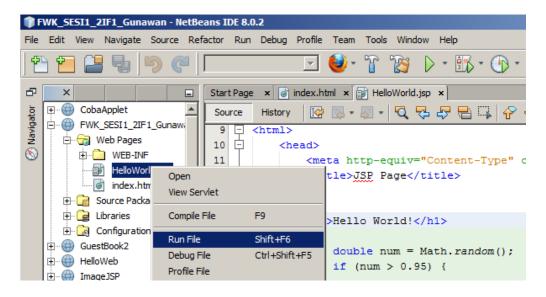

11. Isikan Nama file HelloWorld lalu klik Finish

12. Ketik kode program di bawah ini:

```
Start Page 🗴 🕝 index.html 🗴 📦 HelloWorld.jsp 🗴
             Source
     <html>
   白
10
         <head>
11
             <meta http-equiv="Content-Type" content="text/html; charset=UTF-8">
12
             <title>JSP Page</title>
         </head>
13
14
   Ė
         <body>
             <h1>Hello World!</h1>
15
16
   <8
                 double num = Math.random();
17
                if (num > 0.95) {
18
19
   白
             <h2>You'll have a luck day!</h2>(<%= num%>)
20
21
   22
             } else {
23
             %>
24
   白
             <h2>Well, life goes on ... </h2>(<%= num%>)
25
26
27
             <a href="<%= request.getRequestURI()%>"><h3>Try Again</h3></a></a>
9
   29
         </body>
```

- 13. Simpan program, klik Save All.
- 14. Jalankan progam, klik kanan file HelloWorld lalu klik Run File

Hasilnya:

Hello World!

Well, life goes on ...

(0.5258161431100978)

Try Again

Klik link Try Again (beberapa kali sampai muncul tampilan berikut ini)

Hello World!

You'll have a luck day!

(0.9932420158940781)

Try Again

TUGAS:

1. Buat file JSP di project yang baru saja Anda buat, simpan dengan nama echo.jsp

```
Pr□ <html>
   □ <head>
 2
 3
        <title>Echoing HTML Request Parameters</title>
      </head>
 4
   - <body>
 5
 6
        <h3>Choose an author:</h3>
 7
        <form method="get">
 8
 9
          <input type="checkbox" name="author" value="Tan Ah Teck">Tan
10
          <input type="checkbox" name="author" value="Mohd Ali">Ali
          <input type="checkbox" name="author" value="Kumar">Kumar
11
12
          <input type="submit" value="Query">
13
        </form>
14
   <%
15
        String[] authors = request.getParameterValues("author");
16
        if (authors != null) {
17
18
19
          <h3>You have selected author(s):</h3>
20
          <u1>
        <%
21
22
            for (int i = 0; i < authors.length; ++i) {
23
        %>
24
              <\frac{1}{2} = authors[i] \frac{2}{2} </li>
25
        <%
26
           }
27
        %>
28
          <a href="<%= request.getRequestURI() %>">BACK</a>
29
30
        < %
31
        }
32
        %>
33
      </body>
      </html>
```

2. Buat file JSP di project yang baru saja Anda buat. Form input pendaftaran mahasiswa siswa baru.
